Networks and Algorithms: An Introductory Approach Alan Dolan, Joan Aldous

Networks and Algorithms An Introductory Approach Alan Dolan, Faculty of Technology, The Open University, Milton Keynes, UK Joan Aldous, Faculty of Mathematics, The Open University, Milton Keynes, UK Network theory has in recent years become a valuable aid to planning and analysis in an increasingly wide range of applications in industry, commerce and government. This book provides a comprehensive introduction to this topic and its applications. Detailed solution procedures (usually in the form of an algorithm) are given to a wide range of central network problems including longest and shortest paths, critical path scheduling, location problems, electrical networks, maximum flow problems and transportation problems. There is also a discussion of the time complexity of algorithms and the theory of NP-completeness. An early chapter provides the basic graph theory required for a study of networks. Particular attention has been paid to the presentation, clarity and arrangement of the material, making it ideal for independent study as well as for use with conventional teaching. Algorithms are worked through step by step and problems (with complete worked solutions) are regularly provided to enable students to test and reinforce their learning. The book can be used in conjunction with, or as a sequel to, Graphs: An Introductory Approach by Wilson and Watkins, and is ideal for undergraduate students of mathematics, computer science and operational research.

From reader reviews:

Thomas Barreto:

Have you spare time to get a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a walk, shopping, or went to the particular Mall. How about open as well as read a book allowed Networks and Algorithms: An Introductory Approach? Maybe it is being best activity for you. You recognize beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have additional opinion?

Sheila Carter:

Reading a publication can be one of a lot of task that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a publication will give you a lot of new details. When you read a guide you will get new information due to the fact book is one of numerous ways to share the information or even their idea. Second, looking at a book will make an individual more imaginative. When you studying a book especially fiction book the author will bring one to imagine the story how the character types do it anything. Third, you are able to share your knowledge to other folks. When you read this Networks and Algorithms: An Introductory Approach, you are able to tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a guide.

Edward McCain:

The e-book untitled Networks and Algorithms: An Introductory Approach is the book that recommended to you you just read. You can see the quality of the publication content that will be shown to a person. The language that author use to explained their way of doing something is easily to understand. The copy writer was did a lot of analysis when write the book, therefore the information that they share for you is absolutely accurate. You also might get the e-book of Networks and Algorithms: An Introductory Approach from the publisher to make you much more enjoy free time.

Eva Solares:

Reading can called thoughts hangout, why? Because when you are reading a book particularly book entitled Networks and Algorithms: An Introductory Approach your head will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely can be your mind friends. Imaging every single word written in a guide then become one contact form conclusion and explanation in which maybe you never get ahead of. The Networks and Algorithms: An Introductory Approach giving you a different experience more than blown away your thoughts but also giving you useful details for your better life within this era. So now let us present to you the relaxing pattern the following is your body and mind will likely be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary paying spare time activity?
