Biopolymer Engineering in Food Processing (Contemporary Food Engineering)

Biopolymer Engineering in Food Processing (Contemporary Food Engineering)

Due to their unique properties and ability to interact with other food components, biopolymers have traditionally played a major role in food processing. **Biopolymer Engineering in Food Processing** explores processing technology associated with biopolymer applications and discusses both operational and economic aspects.

Following an overview of biopolymer applications and their functionality in different processes, the text examines:

- Production routes, availability, costs, and physicochemical properties of commercial biopolymers
- Rheology of biopolymer suspensions, how concentration and shear may affect their flow behavior, and their response to pressure losses and heat transfer during flow
- Effects of food processing and storage conditions on the viscoelastic and textural properties of food gels
- Mechanical and mass transfer properties of films and coating produced from biopolymers, composites, and nanocomposites
- The use of biopolymer coatings to reduce oil uptake during deep-fat frying of foods and in modified atmosphere storage of foods

The book also explores the application of biopolymers in separation processes for recovery of biocompounds. It discusses biopolymer behavior during thermoplastic extrusion and the response of certain cereals and snacks to extrusion operating parameters. Finally, it reviews engineering aspects of biopolymers used as drying aids in spray-drying and freeze-drying of fruit juices and pulps and discusses biopolymers used as cryoprotectants in food freezing.

A comprehensive source of scientific and technical information for those involved with process design and research and development, the book is also an ideal reference for academic researchers and undergraduate and postgraduate students.

From reader reviews:

Willie Letchworth:

This Biopolymer Engineering in Food Processing (Contemporary Food Engineering) book is not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is information inside this reserve incredible fresh, you will get details which is getting deeper you actually read a lot of information you will get. This particular Biopolymer Engineering in Food Processing (Contemporary Food Engineering) without we realize teach the one who reading it become critical in considering and analyzing. Don't always be worry Biopolymer Engineering in Food Processing (Contemporary Food Engineering) can bring when you are and not make your bag space or bookshelves' grow to be full because you can have it in your lovely laptop even cell phone. This Biopolymer Engineering in Food Processing (Contemporary Food Engineering) having excellent arrangement in word in addition to layout, so you will not sense uninterested in reading.

Scott Tucker:

This Biopolymer Engineering in Food Processing (Contemporary Food Engineering) usually are reliable for you who want to become a successful person, why. The reason of this Biopolymer Engineering in Food Processing (Contemporary Food Engineering) can be on the list of great books you must have is definitely giving you more than just simple reading food but feed you with information that perhaps will shock your previous knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions in e-book and printed kinds. Beside that this Biopolymer Engineering in Food Processing (Contemporary Food Engineering) giving you an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we know it useful in your day pastime. So , let's have it and revel in reading.

Roberta Haile:

In this period globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The book that recommended to you personally is Biopolymer Engineering in Food Processing (Contemporary Food Engineering) this guide consist a lot of the information of the condition of this world now. This specific book was represented so why is the world has grown up. The vocabulary styles that writer make usage of to explain it is easy to understand. The actual writer made some study when he makes this book. That's why this book ideal all of you.

Todd Lyons:

Is it you actually who having spare time and then spend it whole day by means of watching television

programs or just laying on the bed? Do you need something totally new? This Biopolymer Engineering in Food Processing (Contemporary Food Engineering) can be the solution, oh how comes? The new book you know. You are consequently out of date, spending your spare time by reading in this brand new era is common not a nerd activity. So what these guides have than the others?
