Aircraft and Rotorcraft System Identification (Aiaa Education Series) Mark B. Tischler, Robert K. Remplr

Presenting proven methods, practical guidelines, and real-world flight-test results for a wide range of state-of-the-art flight vehicles, "Aircraft and Rotorcraft System Identification, Second Edition" addresses the entire process of aircraft and rotorcraft system identification from instrumentation and flight testing to model determination, validation, and application of the results. In this highly anticipated second edition, authors Tischler and Remple have added dedicated in-depth chapters presenting extended model structures and identification results for large flexible transport aircraft, and the detailed methodology to develop a continuous full flight envelope simulation model from individual system identification models and trim test data. Topics Discussed include: Frequency-response methods that are especially well suited for system identification of flight vehicle models from flight-test data; specific guidelines for flight testing, data analysis, and the proper selection of model structure complexity; and emphasis on the importance of physical insight in model development and applications. Special features: student version of CIPHER[registered] with updated graphical user interface using MATLAB[registered]; numerous flight-test results for both manned and unmanned vehicles illustrating the wide-ranging roles of system identification, including the analysis of flight mechanics, feedback control, handling qualities, subsystem dynamics, structural analysis, higher-order models for aircraft and rotorcraft, and simulation; and, extensive problem sets at the end of each chapter, with many exercises based on flight-test data provided for the XV-15 in hover and cruise giving the reader hands-on real-world experience with system identification methods and interpretation of the results.

From reader reviews:

Chris Bynum:

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each guide has different aim or even goal; it means that reserve has different type. Some people feel enjoy to spend their time and energy to read a book. These are reading whatever they get because their hobby is actually reading a book. What about the person who don't like looking at a book? Sometime, person feel need book if they found difficult problem or exercise. Well, probably you should have this Aircraft and Rotorcraft System Identification (Aiaa Education Series).

Eugene Obrien:

Here thing why this kind of Aircraft and Rotorcraft System Identification (Aiaa Education Series) are different and reliable to be yours. First of all looking at a book is good nonetheless it depends in the content of computer which is the content is as delightful as food or not. Aircraft and Rotorcraft System Identification (Aiaa Education Series) giving you information deeper and in different ways, you can find any guide out there but there is no publication that similar with Aircraft and Rotorcraft System Identification (Aiaa Education Series). It gives you thrill studying journey, its open up your eyes about the thing that will happened in the world which is might be can be happened around you. It is possible to bring everywhere like in playground, café, or even in your method home by train. Should you be having difficulties in bringing the paper book maybe the form of Aircraft and Rotorcraft System Identification (Aiaa Education Series) in e-book can be your substitute.

Alex Santana:

Aircraft and Rotorcraft System Identification (Aiaa Education Series) can be one of your nice books that are good idea. We recommend that straight away because this guide has good vocabulary that could increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The article writer giving his/her effort to put every word into enjoyment arrangement in writing Aircraft and Rotorcraft System Identification (Aiaa Education Series) nevertheless doesn't forget the main place, giving the reader the hottest and also based confirm resource data that maybe you can be among it. This great information can easily drawn you into brand new stage of crucial contemplating.

Joe Timmons:

What is your hobby? Have you heard in which question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, All people has different hobby. And you also know that little person such as reading or as looking at become their hobby. You need to know that reading is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you take to be your object. One of them are these
