Dragonflies and damselflies are large-winged insects that are usually found in the vicinity of water. Impressive fliers - they can fly forward, backward, glide and hover -they feed on insects they capture on their wing. Despite their large size and prominent jaws, they are harmless to humans and do not bite. This beautifully illustrated guide highlights over 70 familiar and unique species and includes information on their life cycle and features illustrations of common caterpillars and pupae. This guide is an excellent source of portable information and ideal for field use by naturalists of all ages.
