Current Research in Embryology

Current Research in Embryology

Embryology, the study of embryos, is the branch of biological science that examines the formation and early development of an individual organism from fertilization of the egg (*ovum*) to birth. This collection of articles by embryology experts discusses research on some of the most important topics in embryology today. Topics include the cryopreservation of human embryos, *in vitro* generation of neurons from embryonic stem cells, embryonic transfer, transcriptional profiling, and more.
