Digital Color Management: Encoding Solutions Edward J. Giorgianni, Thomas E. Madden

The color-imaging industry is on the threshold of major transformation and enormous expansion as digital color technology comes of age, bringing high-quality color to desktop systems and the Internet. However, the technology is not without challenges. In particular, it must contend with an ever-increasing variety of imaging devices and media. At the same time, it must produce predictable color results from individual systems and provide successful exchange of digital color images among different types of systems. Digital Color Management: Encoding Solutions offers engineers, scientists, and programmers practical solutions to these and other challenges of color imaging in the digital domain. Going beyond standard color-measurement techniques, this book describes advanced methods for digitally representing and communicating color. It provides clearly written background on the science of color and imaging technology, a detailed explanation of digital color encoding today, and an examination of the issues involved in creating a truly device-independent, unified, color-managed environment compatible with all major platforms and devices. Combining the expertise of Edward Giorgianni and Thomas Madden, two principal developers of many color-encoding methods and interchange standards used throughout the color-imaging industry, this book provides a first-hand account of the current state of that industry and an insightful look at its future. The book also features: *Over 350 full-color figures and photographs *Appendices covering the details of color-interchange transformations for current systems, including PhotoYCC, Cineon, FlashPix, and systems using International Color Consortium profile format standards *Foreword by world-renowned color scientist R.W.G. Hunt 0201634260B04062001

From reader reviews:

Susan Williams:

The ability that you get from Digital Color Management: Encoding Solutions may be the more deep you digging the information that hide into the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Digital Color Management: Encoding Solutions giving you thrill feeling of reading. The article writer conveys their point in particular way that can be understood by simply anyone who read it because the author of this reserve is well-known enough. This book also makes your own vocabulary increase well. Making it easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this specific Digital Color Management: Encoding Solutions instantly.

Joyce McDonald:

Hey guys, do you wants to finds a new book you just read? May be the book with the title Digital Color Management: Encoding Solutions suitable to you? Often the book was written by well-known writer in this era. The actual book untitled Digital Color Management: Encoding Solutions is the main of several books in which everyone read now. That book was inspired many people in the world. When you read this reserve you will enter the new dimensions that you ever know prior to. The author explained their concept in the simple way, therefore all of people can easily to comprehend the core of this book. This book will give you a large amount of information about this world now. So you can see the represented of the world in this book.

Caleb Jones:

The book with title Digital Color Management: Encoding Solutions contains a lot of information that you can discover it. You can get a lot of gain after read this book. This specific book exist new information the information that exist in this reserve represented the condition of the world right now. That is important to you to learn how the improvement of the world. This book will bring you with new era of the globalization. You can read the e-book on your smart phone, so you can read it anywhere you want.

Helen Williams:

What is your hobby? Have you heard that will question when you got students? We believe that that concern was given by teacher on their students. Many kinds of hobby, Every person has different hobby. So you know that little person like reading or as examining become their hobby. You need to know that reading is very important and also book as to be the thing. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You see good news or update regarding something by book. Amount types of books that can you choose to adopt be your object. One of them is actually Digital Color Management: Encoding Solutions.
