Unitary Reflection Groups (Australian Mathematical Society Lecture Series) Gustav I. Lehrer, Donald E. Taylor

A complex reflection is a linear transformation which fixes each point in a hyperplane. Intuitively, it resembles the transformation an image undergoes when it is viewed through a kaleidoscope, or arrangement of mirrors. This book gives a complete classification of all groups of transformations of n-dimensional complex space which are generated by complex reflections, using the method of line systems. In particular: irreducible groups are studied in detail, and are identified with finite linear groups; reflection subgroups of reflection groups are completely classified; the theory of eigenspaces of elements of reflection groups is discussed fully; an appendix outlines links to representation theory, topology and mathematical physics. Containing over 100 exercises ranging in difficulty from elementary to research level, this book is ideal for honors and graduate students, or for researchers in algebra, topology and mathematical physics.

From reader reviews:

Eileen Lopez:

Book is to be different for each grade. Book for children until finally adult are different content. As it is known to us that book is very important for us. The book Unitary Reflection Groups (Australian Mathematical Society Lecture Series) has been making you to know about other expertise and of course you can take more information. It is quite advantages for you. The book Unitary Reflection Groups (Australian Mathematical Society Lecture Series) is not only giving you considerably more new information but also to become your friend when you experience bored. You can spend your current spend time to read your e-book. Try to make relationship using the book Unitary Reflection Groups (Australian Mathematical Society Lecture Series). You never really feel lose out for everything if you read some books.

Eva Solares:

Typically the book Unitary Reflection Groups (Australian Mathematical Society Lecture Series) will bring that you the new experience of reading a new book. The author style to clarify the idea is very unique. If you try to find new book to read, this book very acceptable to you. The book Unitary Reflection Groups (Australian Mathematical Society Lecture Series) is much recommended to you to read. You can also get the e-book through the official web site, so you can quickly to read the book.

Rosalie Castillo:

What is your hobby? Have you heard that question when you got students? We believe that that query was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. So you know that little person similar to reading or as looking at become their hobby. You need to understand that reading is very important in addition to book as to be the factor. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You see good news or update concerning something by book. Amount types of books that can you go onto be your object. One of them is actually Unitary Reflection Groups (Australian Mathematical Society Lecture Series).

Robert Bryant:

Reading a guide make you to get more knowledge from that. You can take knowledge and information from your book. Book is published or printed or highlighted from each source this filled update of news. In this particular modern era like right now, many ways to get information are available for anyone. From media social like newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just seeking the Unitary Reflection Groups (Australian Mathematical Society Lecture Series) when you required it?
