**Distance Sampling: Methods and Applications (Methods in Statistical Ecology)** Stephen T. Buckland, E.A. Rexstad, Tiago A. Marques, C.S. Oedekoven

In this book, the authors cover the basic methods and advances within distance sampling that are most valuable to practitioners and in ecology more broadly. This is the fourth book dedicated to distance sampling. In the decade since the last book published, there have been a number of new developments. The intervening years have also shown which advances are of most use. This self-contained book covers topics from the previous publications, while also including recent developments in method, software and application.

Distance sampling refers to a suite of methods, including line and point transect sampling, in which animal density or abundance is estimated from a sample of distances to detected individuals. The book illustrates these methods through case studies; data sets and computer code are supplied to readers through the book's accompanying website. Some of the case studies use the software Distance, while others use R code. The book is in three parts. The first part addresses basic methods, the design of surveys, distance sampling experiments, field methods and data issues. The second part develops a range of modelling approaches for distance sampling data. The third part describes variations in the basic method; discusses special issues that arise when sampling different taxa (songbirds, seabirds, cetaceans, primates, ungulates, butterflies, and plants); considers advances to deal with failures of the key assumptions; and provides a check-list for those conducting surveys.

#### From reader reviews:

#### **Daniel Padilla:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite guide and reading a publication. Beside you can solve your condition; you can add your knowledge by the e-book entitled Distance Sampling: Methods and Applications (Methods in Statistical Ecology). Try to the actual book Distance Sampling: Methods and Applications (Methods in Statistical Ecology) as your buddy. It means that it can being your friend when you truly feel alone and beside those of course make you smarter than previously. Yeah, it is very fortuned for you. The book makes you considerably more confidence because you can know almost everything by the book. So, we need to make new experience as well as knowledge with this book.

#### **Daniel Johnson:**

Reading a publication can be one of a lot of activity that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people enjoyed. First reading a e-book will give you a lot of new information. When you read a publication you will get new information because book is one of many ways to share the information as well as their idea. Second, studying a book will make a person more imaginative. When you reading a book especially fiction book the author will bring someone to imagine the story how the personas do it anything. Third, you could share your knowledge to other individuals. When you read this Distance Sampling: Methods and Applications (Methods in Statistical Ecology), you could tells your family, friends and soon about yours reserve. Your knowledge can inspire average, make them reading a publication.

#### **Stanley Rivas:**

A lot of people always spent their very own free time to vacation as well as go to the outside with them family or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, or playing video games all day long. If you wish to try to find a new activity this is look different you can read a book. It is really fun for you personally. If you enjoy the book that you simply read you can spent 24 hours a day to reading a e-book. The book Distance Sampling: Methods and Applications (Methods in Statistical Ecology) it is quite good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. If you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore easily to read this book from your smart phone. The price is not to fund but this book features high quality.

#### **Joyce Martinez:**

Do you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its handle may doesn't work is difficult job because you are frightened that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer may be Distance Sampling: Methods and Applications (Methods in

Statistical Ecology) why because the wonderful cover that make you consider in regards to the content will not disappoint you. The inside or content is usually fantastic as the outside or even cover. Your reading 6th sense will directly assist you to pick up this book.
