## **The Carbon Sequester: Rising oceans threaten the future of mankind and demand an end to the Oil Age** Mr Arj Mukherjee

Ricky grows up to fulfill his childhood dream of becoming an engineer and rises to spectacular heights of fame and wealth in the oil industry. But his conscience is troubled by the harm to the planet from the use of oil and fossil fuels, especially the damage resulting from climate change and rising oceans, which threaten the future of mankind. He plans to cash out his fortune, settle down with the love of his life, and dedicate himself to a future beyond oil. Alas, tragedy strikes, preventing him from implementing his vision as planned. Despite the tragic adversity, through toil, tenacity, and a bit of luck, he miraculously develops the technology that is the Holy Grail of energy—a brand new, renewable substitute to oil, using carbon dioxide as a raw material. Little does Ricky realize that proposing a future beyond oil will be seen as a massive threat by the powerful world of oil. In a stunning setback to Ricky, an unexpected threat emerges, in which he is issued an ultimatum to hand over his technology or face grave consequences. There is no ambiguity in the message, or veil on the threat, leaving Ricky reeling at the truth that his life is in danger unless he gives away his brain-child, the reason he lives for. What should Ricky do? Buckle to the threat and give away his reason to live, to save his life? Run the deadly risk of refusing to yield to the belligerence of the dangerous forces that threaten him? Can the world afford to lose this opportunity to roll back Climate Change? Read The Carbon Sequester, ride the edge of your seat in suspense, and find out.
