Topics in Phosphate Chemistry Andre Durif, Marie-Therese Averbuch-Pouchot

This book aims to open new fields of interest in phosphate chemistry and to suggest a new system of classification for phosphates. Due to the very rapid development of this branch of chemistry during the last thirty years and the very confusing nomenclature often used in chemical literature, this first attempt seems not only justified but necessary. The suggested classification is not revolutionary, with respect to condensed phosphates for instance, but establishes clear boundaries between some categories of compounds such as adducts and heteropolyanion-compounds. The first chapters cover the present state of phosphate chemistry in a general way and could serve as an introduction to phosphates for some categories of students or teachers. The next few chapters are devoted to more specialized topics which would be of interest to chemists, crystallographers or solid-state specialists. Some specific aspects of the crystal chemistry of phosphates, such as the geometry of the networks built by acidic phosphoric anions, for instance, are covered for the first time. The final chapter suggests some improvements for the present system of classification for phosphates. In addition, presented for the first time are the results recently obtained for the replacement of asbestos by harmless biodegradable phosphate fibers.

From reader reviews:

Arthur Pascual:

What do you regarding book? It is not important along? Or just adding material when you require something to explain what the one you have problem? How about your time? Or are you busy man? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Every person has many questions above. They need to answer that question because just their can do this. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need this kind of Topics in Phosphate Chemistry to read.

Mary Barnett:

In this 21st centuries, people become competitive in each way. By being competitive now, people have do something to make these survives, being in the middle of typically the crowded place and notice through surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yep, by reading a reserve your ability to survive boost then having chance to stand than other is high. For you personally who want to start reading a new book, we give you this particular Topics in Phosphate Chemistry book as beginning and daily reading reserve. Why, because this book is greater than just a book.

Billie Gould:

This Topics in Phosphate Chemistry is great e-book for you because the content and that is full of information for you who else always deal with world and also have to make decision every minute. This kind of book reveal it info accurately using great organize word or we can declare no rambling sentences in it. So if you are read the idea hurriedly you can have whole data in it. Doesn't mean it only offers you straight forward sentences but challenging core information with attractive delivering sentences. Having Topics in Phosphate Chemistry in your hand like having the world in your arm, facts in it is not ridiculous 1. We can say that no book that offer you world inside ten or fifteen minute right but this book already do that. So , this is good reading book. Hey there Mr. and Mrs. busy do you still doubt that will?

Catherine Cote:

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you also know that little person including reading or as reading become their hobby. You have to know that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your teacher or lecturer. You will find good news or update about something by book. Amount types of books that can you decide to try be your object. One of them is this Topics in Phosphate Chemistry.
