Aglow in the Dark: The Revolutionary Science of Biofluorescence

Vincent Pieribone, David F. Gruber

Aglow in the Dark: The Revolutionary Science of Biofluorescence Vincent Pieribone, David F. Gruber

In the early 1960s, in a small shack on the Washington coast, a young, self-educated Japanese scientist performed an experiment to determine what made a certain jellyfish glow. The substance he discovered, green fluorescent protein, would revolutionize molecular biology, transforming our study of everything from the AIDS virus to the workings of the brain. *Aglow in the Dark* follows the path that took this glowing compound from its inauspicious arrival on the scientific scene to its present-day eminence as one of the most groundbreaking discoveries of the twentieth century.

The story unfolds in far-flung places, from the coral reefs of the Pacific Ocean, to the medical schools and marine stations of our leading universities, to a cold war-era research laboratory in Moscow. Traversing the globe and the decades, *Aglow in the Dark* conveys the human fascination with bioluminescence, or "living light," its little-known application in war, forensic science, and molecular biology, and how it led to the finding of green fluorescent protein. The book reveals a hidden world where light is manipulated by animals and humans and put to remarkable uses--unlocking the secrets of the human brain, conquering dreaded diseases, and perhaps someday linking minds and machines. The authors deftly lead the reader through a complex story at the interface of biology and physics--and into the realm of wonder on the frontiers of scientific endeavor.

From reader reviews:

Mary York:

Inside other case, little individuals like to read book Aglow in the Dark: The Revolutionary Science of Biofluorescence. You can choose the best book if you like reading a book. Provided that we know about how is important some sort of book Aglow in the Dark: The Revolutionary Science of Biofluorescence. You can add information and of course you can around the world by just a book. Absolutely right, simply because from book you can know everything! From your country right up until foreign or abroad you will end up known. About simple matter until wonderful thing you could know that. In this era, we are able to open a book or searching by internet product. It is called e-book. You should use it when you feel weary to go to the library. Let's study.

Teddy Hathorn:

What do you concerning book? It is not important along with you? Or just adding material when you really need something to explain what the one you have problem? How about your spare time? Or are you busy individual? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have spare time? What did you do? Every individual has many questions above. The doctor has to answer that question mainly because just their can do in which. It said that about book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this kind of Aglow in the Dark: The Revolutionary Science of Biofluorescence to read.

John Bennett:

Hey guys, do you really wants to finds a new book to study? May be the book with the name Aglow in the Dark: The Revolutionary Science of Biofluorescence suitable to you? The particular book was written by renowned writer in this era. The particular book untitled Aglow in the Dark: The Revolutionary Science of Biofluorescence is one of several books which everyone read now. This particular book was inspired a number of people in the world. When you read this guide you will enter the new age that you ever know just before. The author explained their plan in the simple way, consequently all of people can easily to know the core of this reserve. This book will give you a great deal of information about this world now. So that you can see the represented of the world with this book.

Bess Cook:

As a pupil exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some publication, they are complained. Just small students that has reading's internal or real their hobby. They just do what the educator want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading through is not important, boring as well as can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country.

Therefore , this Aglow in the Dark: The Revolutionary Science of Biofluorescence can make you feel more interested to read.
