Recent Advances in Constraints: Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming, CSCLP 2003, ... Papers (Lecture Notes in Computer Science)

Constraint programming is the fruit of several decades of research carried out in mathematical logic, automated deduction, operations research and arti?cial intelligence. The tools and programming languages arising from this research ?eldhaveenjoyedrealsuccessintheindustrialworldastheycontributetosolving hard combinatorial problems in diverse domains such as production planning, communication networks, robotics and bioinformatics. This volume contains the extended and reviewed versions of a selection of papers presented at the Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming (CSCLP2003), which was held from June 30 to July 2, 2003. The venue chosen for the seventh edition of this annual workshop was the Computer and Automation Research Institute of the Hungarian Academy of Sciences (MTA SZTAKI) in Budapest, Hungary. This institute is one of the 20 members of the Working Group on Constraints of the European Research Consortium for Informatics and Mathematics (ERCIM). For many participants this workshop provided the ?rst opportunity to visit their ERCIM partner in Budapest. CoLogNET is the European-funded network of excellence dedicated to s- porting and enhancing cooperation and research on all areas of computational logic, and continues the work done previously by the Compulog Net. In part- ular, the aim of the logic and constraint logic programming area of CoLogNET is to foster and support all research activities related to logic programming and constraint logic programming. The editors would like to take the opportunity and thank all the authors who submitted papers to this volume, as well as the reviewers for their helpful work.

From reader reviews:

Robert Perkins:

Do you have favorite book? If you have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each reserve has different aim or goal; it means that reserve has different type. Some people experience enjoy to spend their the perfect time to read a book. They can be reading whatever they acquire because their hobby will be reading a book. Think about the person who don't like looking at a book? Sometime, man feel need book when they found difficult problem or even exercise. Well, probably you will require this Recent Advances in Constraints: Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming, CSCLP 2003, ... Papers (Lecture Notes in Computer Science).

Barbara Jackson:

Book will be written, printed, or outlined for everything. You can understand everything you want by a book. Book has a different type. As it is known to us that book is important issue to bring us around the world. Beside that you can your reading talent was fluently. A book Recent Advances in Constraints: Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming, CSCLP 2003, ... Papers (Lecture Notes in Computer Science) will make you to always be smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think this open or reading a book make you bored. It's not make you fun. Why they are often thought like that? Have you seeking best book or acceptable book with you?

Randy Mosley:

Playing with family in a park, coming to see the ocean world or hanging out with good friends is thing that usually you could have done when you have spare time, after that why you don't try issue that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Recent Advances in Constraints: Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming, CSCLP 2003, ... Papers (Lecture Notes in Computer Science), you could enjoy both. It is fine combination right, you still want to miss it? What kind of hang-out type is it? Oh seriously its mind hangout men. What? Still don't get it, oh come on its known as reading friends.

Vincent Olson:

What is your hobby? Have you heard which question when you got students? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person just like reading or as studying become their hobby. You have to know that reading is very important and book as to be the thing. Book is important thing to provide you knowledge, except your

personal teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you choose to use be your object. One of them is niagra Recent Advances in Constraints: Joint ERCIM/CoLogNET International Workshop on Constraint Solving and Constraint Logic Programming, CSCLP 2003, ... Papers (Lecture Notes in Computer Science).
