## **Take Off With Airplane Science!** Be Naturally Curious

Designed for grades K–5 and to be done at home or with small groups, this interactive multi-activity mini-course introduces children to the key physical concepts underlying flight and aircraft design. The mini-course includes a richly illustrated story-based lesson as well as games, activities, and projects that appeal to all types of learners.

The mini-course begins with a story in which fundamental physical concepts, such as Bernoulli’s Principle, are introduced. Children are then able to explore what they’ve learned through a series of simple at-home experiments. Using what they’ve learned about aircraft design and airflow, children are provided with a paper airplane template, complete with rudder and elevators, and an experimental journal to explore how changes to their design affect the airplane’s flight. The relationship between aircraft design and flight is further reinforced through a card game (included in the course) in which the wing shapes of various birds and other animals are examined and linked to types of flight. Finally, several in-flight activities are provided, including an experiment with air pressure (this experiment can also be done with any change in elevation, such as on a mountain road or in an elevator of a tall building.)

Most materials needed to complete the mini-course can be cut from the book itself (or, if preferred, downloaded and printed using an included link). The mini-course requires only a few additional common household items to complete the activities: a Ping-Pong ball, two small paper cups, a penny, two straws, water, blow-dryer (optional), paper, scissors, tape measure, paper clips, two plastic bottles.

Upon completing the mini-course, children will be provided with links to additional online resources and will earn new concept badges for their Science Tool Kit (included in the mini-course)—including air pressure, airfoil, lift, and flight controls.

### From reader reviews:

#### **Arthur Poulsen:**

Book is to be different for every grade. Book for children until finally adult are different content. To be sure that book is very important for people. The book Take Off With Airplane Science! has been making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The book Take Off With Airplane Science! is not only giving you more new information but also to become your friend when you experience bored. You can spend your own spend time to read your e-book. Try to make relationship with all the book Take Off With Airplane Science!. You never really feel lose out for everything if you read some books.

#### **Gary Ritchie:**

In this 21st century, people become competitive in most way. By being competitive at this point, people have do something to make these survives, being in the middle of typically the crowded place and notice through surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yes, by reading a reserve your ability to survive raise then having chance to stand up than other is high. For you who want to start reading any book, we give you this kind of Take Off With Airplane Science! book as basic and daily reading reserve. Why, because this book is more than just a book.

#### **Scott Tucker:**

Can you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Make an effort to pick one book that you find out the inside because don't ascertain book by its cover may doesn't work here is difficult job because you are scared that the inside maybe not since fantastic as in the outside seem likes. Maybe you answer can be Take Off With Airplane Science! why because the wonderful cover that make you consider concerning the content will not disappont you. The inside or content is definitely fantastic as the outside or maybe cover. Your reading sixth sense will directly assist you to pick up this book.

#### **Lorraine Joyner:**

As we know that book is important thing to add our knowledge for everything. By a publication we can know everything we want. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book Take Off With Airplane Science! was filled regarding science. Spend your spare time to add your knowledge about your technology competence. Some people has distinct feel when they reading the book. If you know how big benefit from a book, you can truly feel enjoy to read a e-book. In the modern era like at this point, many ways to get book you wanted.
